

Further, Faster, Together: Under2 Leaders Action at COP26

Setting the agenda for 2030

Purpose

The UN Climate Summit in Glasgow (COP26) is a significant opportunity to set the agenda for state and regional efforts on climate between now and 2030. As the world's leading climate ambition coalition, the Under2 Coalition will demonstrate through this document that state and regional governments are on the frontline of implementation and serious about taking transformative and far-reaching action towards the 2030 agenda.

States and regions continue to be vital to global efforts to fight climate change and Under2 Coalition member governments have each adopted plans for a wide range of ambitious actions across different sectors to address the climate crisis - with targets of 2030 or earlier.

Actions As reflected in this document, together with the Under2 Coalition's new MoU, governments intend to build on progress to date and take concrete steps towards our collective goal: a world of no more than 1.5 degrees warming through 2050 with greater prosperity for all.

We, the governments, are focused on helping each other succeed in meeting these targets. The goals here are 3-fold:

- 1) Increase our individual and collective ambition to compel our national governments to do the same;
- 2) Send a clear market signal that there is a demand for zero-emission technologies and incentivize industry to invest and produce (e.g. the 100% MDV/HDV state fleets by 2040 target would spur investment in heavy-duty EV technologies); and
- 3) Demonstrate tangible climate action. We all understand that not all of the listed policies are fully within state or regional control (for example, quite a lot of this will require action by local or national governments and/or legislative branches). To that effect, we'll focus on continuing this coalition to share best practices, technical assistance, etc. to make these actions a reality.

Inter-governmental Cooperation and Planning

Provide fiscal or programmatic incentives, funding and/or technical support to cities to halve emissions by 2030 and go net-zero by 2050 latest.

	<i>Yucatán</i>
100% zero-emission med- & heavy-duty public fleets by 2040, where technically feasible*	<i>Baden-Württemberg</i> <i>British Columbia</i> <i>Chungcheongnam-do</i> <i>Jeju</i> <i>New York City</i> <i>New York State</i> <i>Québec</i> <i>Scotland</i> <i>Washington State</i>
100% zero-emission from off-road vehicles and equipment operations by 2035	<i>British Columbia</i> <i>California</i> <i>New York City</i>
Promote sustainable communities that provide a range of affordable housing and transportation options that increase access to opportunity and reduce vehicle miles travelled (VMT).	<i>Baden-Württemberg</i> <i>California</i> <i>Chungcheongnam-do</i> <i>Jeju</i> <i>New South Wales</i> <i>New York City</i> <i>New York State</i> <i>Rhode Island</i> <i>Scotland</i> <i>Washington State</i>
Reduce national car kms travelled by 20% (based on 2019 levels) by 2030	<i>Scotland</i>

*This target aligns with the Climate Group’s [ZEV Pledge for public fleets](#). In signing up to this target you will automatically be invited to join the ZEV Pledge. Sign up [here](#).

Energy

Carbon neutral electricity by 2030

- British Columbia*
- Catalonia*
- Jeju*
- Mato Grosso do Sul*
- Québec*
- Rhode Island (tentatively)*
- Scotland*
- Washington State*

100% zero-carbon electricity by 2045

- British Columbia*
- California*
- Catalonia*
- Emilia-Romagna*
- Jalisco*
- Jeju*
- New York City*
- New York State*
- Québec*
- Scotland*
- Washington State*

Phase out of gas/oil-powered heating, cooling, and hot water equipment by 2035.

- British Columbia*

Reduce emissions from cooling equipment by 20% by 2030	<i>Western Cape</i>
Reduce methane emissions from the oil and gas sector 45-50% by 2025 and no less than 75-80% by 2030, below 2015 levels	<i>British Columbia</i>
Environmental justice	
Empower disadvantaged communities and foster leadership to develop climate/clean energy solutions and policies through training, facilitation and funding	<i>British Columbia</i> <i>California</i> <i>Campeche</i> <i>Chungcheongnam-do</i> <i>Jeju</i> <i>Maharashtra</i> <i>Mato Grosso do Sul</i> <i>New South Wales</i> <i>New York City</i> <i>New York State</i> <i>Scotland</i> <i>Rhode Island</i> <i>Québec</i> <i>Washington State</i> <i>Western Cape</i> <i>Yucatán</i>
Establish a goal that least 40% of the benefits of expenditures with environmental and economic benefits flow to vulnerable populations and disadvantaged communities, including remote communities.	<i>New York State</i> <i>Washington State</i>

Commit to a just transition that provides for sustainable livelihoods for those reliant on the fossil fuel economy in the shift to more sustainable systems and practices

Accountability

This declaration is part of an ongoing process of broader climate accountability. Each year the Under2 Ambition Tracker will collect information on what each state or region has been doing in the past 12 months to ensure it is moving towards the Under2 Coalition Memorandum of Understanding. Signatories to this document also participate in a wide variety of public reporting platforms to mark their climate action.

Notes:

1. This is an effort led by governments, for the governments of the Under2 Coalition, coordinated by Climate Group as Secretariat. The initial idea was developed by the states of Washington, New South Wales, Scotland, and was supported by members of the Under2 Coalition Steering Group, states and regions that attended the 100 Days to COP26 event hosted by the Secretariat and UN High Level Champions, and the drafting committee.
2. State and regional governments do not have to sign up to all of the above actions. In recognition of the geographical and political differences of members, signatories are encouraged to sign up to the actions more applicable to their state or region.
